

Investor Event

Structural trends driving our next phase of growth

Bill Winters
Group Chief Executive

19 May 2026

What you will hear today

Our 'super-connector' combination of network and products is hard to replicate, and valued by clients

Our strategy is aligned with long-term structural growth drivers

We have clear and measurable plans to boost productivity

We will deliver exceptional growth and sustainably higher returns, with clear milestones to 2028 and beyond

Disciplined Execution

Durable Returns

Compounding Growth

We are primed for the next phase of growth

We offer a distinctive, growth-oriented client proposition

Scale

- ✓ #2 Transaction Bank in Asia¹

Growth

- ✓ Network income 9% CAGR (2019-2025)
- ✓ 66% of total CIB income² (2019: 57%)

Scale

- ✓ #3 Wealth Manager in Asia³ (2019: #5)

Growth

- ✓ Fastest net new money growth⁴ in Asia: 14%
- ✓ AUM doubled since 2019

Our combination of product and network capabilities is unique

Our strategy is hard to replicate and converts cross-border complexity into client value and sustainably higher returns

Income by type

Income by geography

Income by product

We are investing to capture the changing needs of our clients

Structural trends changing client needs play to our trusted competitive advantages, reinforcing the logic of our strategy

The emergence of
a multi-polar and
multi-aligned world

Non-replicable
network across
dynamic corridors

Digital transformation
and evolving client
expectations

Market-leading
capabilities in
digital finance

The changing role
of banks in serving
the real economy

Able to originate,
structure and
distribute scarce assets

Rising wealth
participation reshaping
capital markets

Deep local expertise
with access to
global markets

The transition
economy and
sustainable finance

Local insight with
cross-border
structuring expertise

The emergence of a multi-polar and multi-aligned world

The trend ...

- Geopolitical alignment is less stable, increasing cross-border complexity
- Manufacturing/supply ecosystem shifts drive investment into our markets
- New opportunities but also complexity for clients operating internationally

Increasing APAC share of global GDP¹

Reconfiguration of trade flows²

2025 vs 2024

US-China	▼ 30%
US-ASEAN	▲ 22%
US-India	▲ 16%
China-ASEAN	▲ 8%
China-Africa	▲ 18%

... and our competitive advantages

- Decades of investment have built hard-to-replicate capabilities
- Local insight reduces friction and execution risk across dynamic borders
- Expertise across complex trade corridors, e.g. leading Renminbi franchise

54 global locations, connected with deep cross-border capabilities

#2 Transaction Bank in Asia³

#2 Global Documentary Trade³

#1 Syndicated loans arranger in our footprint markets⁴

#1 RMB bank in 20 markets⁵

#1 Foreign bank trading China Gov't bonds by volume⁶

4 International wealth hubs⁷

Digital transformation and evolving client expectations

The trend ...

- Money is becoming digital, programmable and seamlessly connected
- Digital-first models are resetting client expectations
- Innovation is changing delivery methods, not the need for trusted banks

Stablecoin circulation to grow 7x in the next 3 years¹

Agentic commerce will account for a growing proportion of e-commerce²

... and our competitive advantages

- Acknowledged leader in digital assets (DA), with comprehensive capabilities
- Institutional-grade solutions: trading, custody, payments and lending
- Leading digital banks in Hong Kong and Singapore

Early-mover among G-SIBs in DA capabilities, including:

- 1st G-SIB to launch DA spot trading and custody (including BTC, ETH)
- License to issue HKD stablecoin (issuing on public blockchain)
- Cross-border payments via central bank platforms (e-CNY, mBridge)

Stablecoin transaction volumes

 **ZodiaMarkets**
stablecoin activity

Share of USDC mint

The changing role of banks in serving the real economy

The trend ...

- Banks shifting from balance-sheet accumulation to distribution
- Capital rules have made some activities more capital-intensive
- Non-banks play a growing role in credit, pricing and liquidity

Increasing NBFI share of global financial assets¹

Private credit continues to grow²

... and our competitive advantages

- Ability to originate assets in markets others cannot easily access
- Ability to structure and distribute risk at scale
- Corporate / institutional / wealth platform links borrowers to investors

Top 3

Asia-Pacific ex-Japan
EM FICC³

Bridging access to
Emerging Markets

#1

Syndicated Loans
arranger in our
footprint⁴

Rising wealth participation is reshaping capital markets

The trend ...

- Wealth in Asia is growing rapidly, and clients are diversifying cross-border
- Capital markets participation growing in our footprint with policy support
- Technology is broadening market participation for the young

Globally

>\$80tn

inter-generational wealth transfer by 2048¹

Government pension funds

+9%

assets under management growth²

APAC will account for almost half of all new HNWI's created between 2025 and 2028³

~48%
Asia

~52%
Rest of World

... and our competitive advantages

- Fully scaled and differentiated affluent franchise across growth markets
- Deep local expertise combined with access to global capital markets
- Open architecture and technology offering best-of-breed wealth products

Global Chinese
(example of advantaged growth engine)

2.2%

in 2023

2.6%

in 2025

SC estimated market share of Global Chinese AUM⁴

Market leader in bringing hard-to-access, exclusive products to our clients

\$2.5bn VCC AUM⁵

(Launched in June 2024)

Across 7 products, 8 markets from SC Funds VCC (Variable Capital Company)

The transition economy and sustainable finance

The trend ...

- The shift to a lower-carbon economy is reshaping capital allocation
- Emerging markets driving growth in population, energy and infrastructure
- Shifting from “green only” to credible, affordable transition pathways

Energy transition investments reached an all-time high in 2025

(\$tn)

... and our competitive advantages

- Leading sustainable finance franchise across our footprint
- Local insight with cross-border connectivity and structuring expertise
- Presence where the transition is most complex and capital-constrained

Achieved \$1bn Sustainable Finance income target

Sustainable Finance income (\$bn)

Deliberate choices have structurally improved our business mix...

Business model shifts improve the quality and resilience of our income growth ambitions for 2028 and beyond

Non-interest income % of Group

We are targeting >50% of Group income to be non-interest income in 2028, improving quality and resilience

Network income % of CIB

Our Network is differentiated and diversified, creating competitive advantages hard to replicate

Financial Institutions % of CIB

Our FI business is fast-growing, improving flow income and reinforcing our network value

Affluent income % of WRB¹

Our pivot to Affluent drives deeper relationships, durable fee income and higher quality growth

...and we have improved resilience through risk and capital discipline

We are more capital-light, lower risk, with stronger balance sheet fundamentals

Our uses of capital will be balanced between growth and returns

Recent capital allocation

Disciplined Execution

Durable Returns

Compounding Growth

Target capital allocation

Continuous improvement drives productivity

Building an agile operating model that drives significant productivity benefits: Simple, Connected and Fast

Income per employee¹

Increased productivity

Cost-to-income ratio²

Deliver step-change

Our transformation is powered by agility and innovation

We innovate ahead of structural trends where our franchise has an advantage

Energy Transition

We are confident, ambitious and committed

Our strategy leverages structural growth drivers to compound competitive advantages over time

>15% RoTE in 2028 and ~18% from 2030

High-teens EPS growth

EPS (cents)

Appendices

We operate in the world's most dynamic markets

Present in **54** markets; using the power of our network to maximise opportunities for people and businesses who trade, operate, or invest across our markets. Our diverse experience, capabilities and culture set us apart

Our locations

Europe and America

Our Americas franchise is focused on CIB business, and our London headquarters also services our Private Bank clients; our EU hub is located in Frankfurt

- Belgium
- Falkland Islands
- France
- Germany
- Jersey
- Luxembourg
- Poland
- Sweden
- Türkiye
- United Kingdom
- Argentina
- Brazil
- Colombia
- United States

Africa and the Middle East

We have a deeply-rooted presence in Africa's most dynamic and emerging markets, and our history in the Middle East dates back to 1920

- Botswana
- Côte d'Ivoire
- Egypt
- Ghana
- Kenya
- Mauritius
- Morocco
- Nigeria
- South Africa
- Tanzania
- Uganda
- Zambia
- Bahrain
- Iraq
- Oman
- Pakistan
- Qatar
- Saudi Arabia
- UAE

Asia

Present in more ASEAN markets than any other international bank, our strong regional presence and continued investment helps us drive connection and support our clients to capitalise on new opportunities

- Australia
- Bangladesh
- Brunei
- Cambodia
- Hong Kong
- India
- Indonesia
- Japan
- Laos
- Macau

Investor Event

Financial roadmap to 2028 and beyond

Manus Costello

Interim Group Chief Financial Officer

19 May 2026

From structural trends to financial framework

Improving profitability, enhancing mix, growing sustainably

Primed for a new phase of growth

1. 2026 guidance unchanged, see appendices for details. Not to scale

We delivered our 2026 plan a year early

Announced \$9.1bn capital distributions to shareholders since Feb'24

2028 financial targets

>15% RoTE in 2028 and ~18% in 2030...

...leading to high-teens EPS growth

2028 RoTE target and EPS growth underpinned by:

Income CAGR
5-7% 2025-2028

Cost-to-income
ratio
~57% in 2028

30-35bps
loan-loss rate
through-the-cycle

13-14%
CET1 ratio

Dividend payout
ratio ≥30%
Progressive DPS

Note: income CAGR target is constant currency and ex-notables; cost-to-income ratio is ex-notables

On a path to >15% RoTE in 2028...

RoTE walk by P&L items

RoTE walk by business mix

...and progressing to ~18% RoTE in 2030

Business mix change expected to drive ~380bps RoTE improvement...

Wealth & Retail Banking (WRB)

Corporate & Investment Banking (CIB)

-  Driving **higher income return on RWA** for the Group
-  Better **growth opportunities** underpinned by structural trends
-  Our network enables more products in more markets and stickier relationships
-  Strong **operating leverage**
-  Improved **risk** profile
-  **Greater connectivity** between Affluent clients and CIB

...including asset & liability mix benefits of ~50bps

Funding surplus

- WRB is our cheapest form of funding and is becoming a higher portion of the overall liability mix
- Growth in WRB funding is faster than WRB assets, leading to a surplus which is deployed to generate high marginal RoTE for the Group
- We also continue to grow CIB CASA, which is an important client product and source of funding diversification

Funding surplus – WRB (\$bn)

Treasury assets

- WRB funding is very stable from a liquidity perspective
- As a result, the Group needs to hold less liquidity for a given amount of funding, reducing the size of Treasury assets as a portion of the Group
- This enables deployment of a larger portion of the balance sheet into commercial lending and trading book assets

Treasury assets as % of funded assets

Combined change in liability and asset mix leads to an uplift of ~50bps in RoTE by 2028
(included in RoTE business mix improvement)

Non-interest income CAGR +13% ex-notables since 2023...

Total income by product

2025 Non-II

1. Global Banking included \$0.3bn of aviation finance income in 2023, zero in 2024/25 after business sale. 13% CAGR is excluding this | 2. Treasury & Other: 2023 includes \$262m gain from sale of Aviation finance; 2025 includes \$113m property gain, \$238m Solv India transaction gain; improvements in Treasury & Other ex-notables from lower yielding legacy swaps and securities rolled into higher rates

...and will continue to grow faster

Total income by product

(\$bn)

Non-interest income as a % of total income¹

Progress on expenses, but with further opportunities

- We have held corporate functions expenses flat since 2023 despite strong income growth
- We have grown frontline to invest in our income opportunities
- Benchmarking analysis suggests further opportunities for improved efficiencies in operations and functions

Operations and functions benchmark higher than peers¹

Expenses split over 2023-2025

(\$bn)

Delivering continuous improvement

- We are targeting
 - Cost-to-income ratio¹ of ~57% in 2028
 - Positive income-to-cost jaws¹ each year
- Maintaining guidance of broadly flat reported expenses for 2026, ex-notables at constant currency
- Continuous improvement will generate savings each year

Cost-to-income ratio¹

- We are building an agile operating model that is Simple, Connected and Fast
 - Fewer core systems enabling differentiated client experiences
 - Connected capabilities driving seamless collaboration
 - Faster decisions closer to the client

~57% cost-to-income ratio¹ in 2028

~20% increase in income per employee² by 2028

>15% reduction in corporate functions³ headcount by 2030

Our business model is lower risk

- Risk metrics have improved steadily over time
 - Investment grade in CIB has improved from 42% to 74% of exposures
 - Corporate PDs have fallen in recent years and are at or below peers
 - CCPL & Other Unsecured portfolio has reduced from 19% to 12% of WRB
- Continue to expect 30-35bps loan-loss rate through-the-cycle

Loan-loss rate through the cycle expected^{1,2}

I/G % of Corporate exposures

CCPL % of WRB lending

Corporate PDs have reduced, and are at or below peers⁴

Operating across 13-14% CET1 ratio range

- Operated at an average 14% CET1 ratio over the last 7 years, and a range of 13.4-14.6%
- At Q1'26, we had the lowest CET1 ratio requirement of major UK banks
- Going forward, we intend to operate across the full 13-14% CET1 ratio range

Our CET1 ratio (%)

CET1 ratio requirements by bank, Q1'26

Strong capital generation; operate within 13-14% CET1 ratio range

We have generated ~330bps of CET1 capital since 2023

Uses of capital

We will operate across the 13-14% CET1 ratio range

Indicative use of capital

Significant capital generation supporting our allocation framework

Capital allocation to drive maximum economic value for shareholders

Looking beyond 2028

Appendices

2026 targets unchanged

1. At constant currency and excluding material notable items (2025 income includes \$113m relating to a property sale, 2025 expenses include \$158m relating to Korea ELS and a litigation settlement)

- Forward FX rates as of 20 Apr 2026 imply negligible impact to income; additional currency translation impact of ~\$0.1bn on expenses
- Base for 2025 income ex-notables and on forward FX is ~\$20.8bn; base for 2025 expenses ex-notables and on forward FX is ~\$13.2bn

We have optionality on funding and deployment

- Funding is raised across variety of products and tenors, giving strong diversification
- Within entities funding can be deployed into different asset types:
 - Treasury assets & customer lending in WRB and CIB (banking book, NII)
 - Funding the trading book (Non-interest income and NII)
- Focused on driving marginal higher RoTE; whether that is trading book or banking book
- Trading book includes client access financing (i.e. a TRS access trade for a client seeking cross-border opportunities), and market making

Trading book split (ex repo & secured financing)

Hedging strategy reducing NII volatility

Hedge evolution

- Overall duration strategy includes:
 - Treasury structural hedge positions of swaps and HTC securities (\$87bn)
 - Portfolio of client fixed rate mortgage assets (\$22bn)
 - Dynamic management of FVOCI securities adds duration
- Hedge will increase in 2026 but not necessarily at the same pace as 2025, with new hedges subject to market conditions and capacity constraints

Notional (\$bn)

WAM (years)	4.4	3.4	2.9	3.0 ¹	2.5 ¹
Yield	1.1%	2.0%	3.1%	3.5% ¹	3.4% ¹

Interest rate risk in the banking book (IRRBB)

- FY'25 NII sensitivity increased due to balance sheet growth and HKD rate movements partially offset by an increase in structural hedging
- Changes in deposit volumes and PTRs at different points through the interest rate cycle may impact sensitivity in the future

Annualised impact to banking book NII from instantaneous -100bps parallel shift in interest rates across all currencies (\$m)

Investor Event

Transformation:

Delivering a Simpler, more Connected and Faster Bank

Tanuj Kapilashrami
Group Chief Operating Officer

Noelle Eder
Group Head, Technology & Operations

19 May 2026

We are transforming for the forces shaping the future of banking

The emergence of
a multi-polar and
multi-aligned world

Digital transformation
and evolving client
expectations

The changing role
of banks in serving
the real economy

Rising wealth
participation reshaping
capital markets

The transition
economy and
sustainable finance

Creating a Simple, Connected and Fast bank for the next phase of growth

Key messages

-  Serving clients as a super-connector requires a simplified organisation and a modern technology platform
-  Building a Simple, Connected and Fast operating model delivering standardisation, scalability and growth without linear cost
-  Continuous improvement and AI-driven acceleration deliver faster execution and clear financial outcomes

We have simplified our operating model

Clear ownership, closer to clients

- Global products / local delivery
- Removed regional layers
- **79%** of market CEOs¹ now double-hatting, up from 28%

Faster, clearer client decisions

Leaner leadership, fewer handoffs

- Executive leadership team² streamlined ▼**27%**
- Fewer layers and committees
- Consolidated adjacent functions

Simpler governance, faster execution

Scaled delivery through shared services

- Back-office centralised into global hubs
- Global processes replacing local variants
- **43%** of workforce at Global Business Services³

Consistent delivery at scale

We have modernised our foundations for growth and resilience

Scale, speed and resilience no longer require linear technology cost or capacity expansion

Three critical platforms strengthened	What this enables	Outcomes
• Global private cloud • Modern core banking platform • Global payments platform	• Scale across markets without additional infrastructure • Faster rollout of capabilities • Standardised core with flexibility to differentiate at the client interface	• ~30%¹ higher throughput per operations employee • 24/7 always-on digital banking • 9x throughput²; 10x processing power; 80% less downtime per year

We are embedding continuous improvement at scale

Transitioning from programme-led change to continuous, disciplined execution

From programme led change

- Fit for Growth has simplified and standardised the Bank
- On track to deliver **\$1.3bn** in savings
- **~300** initiatives delivering step-changes

To continuous improvement

- Improvement built into day-to-day operations
- End-to-end processes mapped and skills assessed
- Clear process ownership with simplified change governance

Delivering measurable outcomes

- **~53%** straight-through-processing in Wealth Solutions
- **~40%** increase in automation of Private Banking credit documentation
- **~14%** reduction in vendor onboarding turnaround time

A distinctive operating model to deliver our super-connector ambition

Simplifying the core and connecting the bank to deliver faster execution and better client outcomes

Simple: standardised at the core, differentiated at the client interface

Lower unit cost, stronger resilience, and scalable growth - delivering more change per dollar invested

Differentiated at the client interface

Configurable,
not bespoke builds

Product, Market, Client
- specific configurations

Standardised global platforms and simpler processes

Build once,
deploy across markets

Reduced fragmentation,
fewer systems and processes

Standardised change
discipline, fewer variants

Connected: seamless across products, markets, client relationships

Vertical and fragmented model

Horizontal shared platforms

Target Outcomes

- Seamless client journeys across products and geographies
- Scalability with lower unit cost
- New growth opportunities
- Faster execution with reduced latency and duplication
- Better analytics from integrated data
- Simplified service delivery
- Scalability and differentiation

Vertical and fragmented model

Global Capability Centres

Fast: executing at pace within guardrails

 1. Time taken to transfer private banking assets, from client instruction confirmation to completion at Standard Chartered.

Amplifying Simple, Connected, Fast through AI

1 Unified Enterprise Platform

serving 54 markets, embedding AI to drive resilience, productivity, and precision

2 Operating Model Shift

matching every task to its right execution mode — autonomous, agent-assisted, or human-led, based on complexity and client impact

3 Scalable AI Capabilities

accelerating delivery, industrialising innovation and sustainably embedding AI across the technology estate

1

Unified Enterprise Platform

serving 54 markets, embedding AI to drive resilience, productivity, and precision

AI Resilience

Risk management Platform

AI enables more consistent application of controls, improving resilience, speed of change, and auditability

80% Controls¹ codified into executable rules and specifications

90% Material controls continuously monitored through AI guardrails

30% Reduction in manual effort for regulatory change implementation

Fully implemented by end 2027

AI Productivity

Enterprise Anti-Crime Platform

Reusable agents delivering faster insights and improving client and employee experience

40% Reduction in false positives

10 mins Faster insights generation for Digital Assets surveillance (from ~21 hours)

Fully implemented by end 2027

AI Precision

Global Data Platform

Single, trusted data foundation to deliver consistent, high-quality data to support risk management, decision-making, and compliance

150+

Independent Data Systems

1

Global Data Supply Chain

Fully implemented by H1 2028

2 Operating Model Shift

Building towards an environment where every task is matched to its right execution mode — autonomous, agent-assisted, or human-led, based on complexity and client impact

Autonomous

AI-Driven Operations

Intelligence embedded into day-to-day processes, enabling self-service at scale

95% Data accuracy through AI document processing¹ (from 85%)

50% Reduction in turnaround time for self service client enquiries

60% Self-resolution for internal queries using virtual assistant

Fully implemented by end 2027

Agent-assisted

AI-Driven Software Development

AI-assisted engineers accelerating time-to-market through high-quality code

Fully implemented by end 2027

Human-led

Enterprise Productivity Uplift

AI supporting everyday work, improving productivity at scale

85k Staff trained and actively using MS CoPilot to realise value

100% Affluent Relationship Managers enabled with AI Advisory capability

Fully implemented by end 2026

3 Scalable AI Capabilities

Accelerating delivery, industrialising innovation, and sustainably embedding AI across the technology estate

Accelerating delivery

Enterprise AI Platform

AI Factory enabling scalable AI use cases across the Bank

43 High impact Gen AI use cases live

300+ Live AI use cases¹ on platform

60% Reduction in marginal cost per additional AI use case

Current

Industrialising innovation

GenAI Concierge

Reusable agents delivering faster insights and improving client and employee experience

39+ Live Chatbots deployed to improve employee and client experience

15% Reduction in human effort through engineering support bots

Fully implemented by end 2026

Embedding AI in tech estate

Central Observability Platform

AI platform that gives comprehensive visibility across all systems, services and client journeys

60+ AI agents providing real-time insights and automations

88% Reduction in monitoring manpower

\$10m Sustainable savings in annual monitoring costs

Current

Our target is a skills-based operating model for an AI-first bank

Rewiring the operating blueprint for scaling autonomy, productivity, and client impact

We are making structural changes to boost productivity

Building an agile operating model that is Simple, Connected and Fast driving significant productivity benefits

1. Employees defined as: Headcount (year-end) plus non-outsourced non-employed workers (NEW) and SC Ventures headcount | 2. Cost-to-income ratio is ex-notables | 3. Corporate functions defined as non-frontline support services headcount (year end) plus non-outsourced non-employed workers (NEW)

In conclusion

Structurally repositioned the bank for scalable growth

Simplified the organisation and modernised core technology

Created a simpler, more resilient and scalable foundation

A Simple, Connected, and Fast operating model

Enables us to operate as one global network

Supports growth without linear cost increases or duplication

Continuous improvement and AI-driven acceleration

Improving, innovating and embedding AI across the bank

Enhancing client experience and employee productivity

Delivering a simpler, more productive and scalable bank, positioning us for sustainable returns and growth

Our network drives superior growth

Our network enables us to grow faster¹

CAGR
2019-2025²

Network income³ (\$bn)

Network % of CIB income³

- Network Income: Income booked outside of a client's home domicile market
- Domestic income: Income booked locally in client's domiciled market

Our network drives superior growth

Cross-border (network) income is diversified across many corridors

- Strategic footprint and corridor focus to maximise growth opportunities
- Global reach with deep local and regulatory expertise
- Leading cross-border Renminbi settlement bank
- Only international bank with a global Islamic banking franchise
- A leading Sustainable Finance franchise across our footprint
- Access to emerging markets with attractive yields and deep EM liquidity and FX expertise
- Full suite of capabilities across risk distribution and bespoke solutions

Our network generates higher returns

- Multi-market, multi-product clients generate 5x-25x higher income
- # of clients with single market/product down to 33% in 2025 from 46% in 2019
- > 70% of network income is from capital-light products
- Network income RoRWA¹ ~200bps higher vs domestic

Multi market/multi product integration driving client stickiness

Income mix

■ Capital-light² ■ Trade Lending & Financing Solutions

Currency mix

■ Client's LCY ex-USD³ ■ USD ■ Client's FCY ex-USD³

We continue to deepen our relationships with clients and maximise addressable wallet

Our network is capturing opportunities in a reconfigured world: MNC

FY'25 YoY Network income growth %

- China is re-routing trade flows
 - Our network is capturing the upside through our investments in Chinese-speaking corridor bankers
- Intra-ASEAN corridor continues to grow
- We are the only international bank present in all ASEAN markets and a super-connector to this region
- Investments in our Europe and Americas franchise are delivering network income growth
- Expansion in new markets (Saudi, Egypt, and Morocco) is an enabler for capturing the growth within MENAP region

Our network is capturing opportunities in a reconfigured world: FI

FY'25 YoY Network income growth %

- Clearing licenses to support banks in our footprint
- Last mile connectivity and custody solutions with direct access to local markets across our footprint
- Access to emerging markets with high entry barriers and market complexities with attractive yields
- Strengthening digitisation and client connectivity to deepen relationships and improve efficiency
- Well-positioned to capture growth in Pension and Insurance segments in markets with ageing population
- Enhanced network capabilities to help clients manage long-term liabilities

Financial Institutions remain an area of focus

Income from Financial Institutions (FI)

- **Top-5 global EM FICC Bank**
- **Top-5 in Electronic FX volumes**

Our FI business is now higher returning and growing faster

FI income by client segment

FIs have higher income RoRWA% compared to Corporates

FI: Higher-return, structurally resilient growth engine

- Returns supported by a collateralised and higher investment-grade risk profile
- Higher proportion of capital-light Global Markets and Payments income, driving stronger RoRWA than Corporates
- Growth underpinned by diversification across different FI segments, and supported by local presence in complex markets

Elevate O2D leveraging local presence in our footprint

Origination volume

Distribution volume

Footprint G3 market share

Why Originate-to-Distribute?

- Higher fee and capital-light income strengthening FI proposition
- Helps penetrate client wallet and grow wallet share
- De-risk low returning assets and re-deploy schedule roll-offs to higher return business

Our strategy

- Our local presence provides us with a competitive edge in originating loans and distributing across our network
- Increase balance sheet velocity by growing origination volumes and higher churn
- Originate and cross-sell across Sponsors' global wallets that fit our network
- Grow infrastructure finance leveraging our deep expertise in complex project financing and growing capabilities in new technologies

We are poised for growth with the right strategy and platform

Where we originate and distribute

Where do we originate...

Origination has increased in line with strategy to grow FI

Sustainable Finance growth underpinned by network, FI & O2D focus

\$1bn Sustainable Finance income target

Target achieved in 2025

Mobilise \$300bn by 2030

\$157bn mobilised as of 2025

Interim 2030 Financed Emissions targets

Good progress against sector targets

We are well-positioned to capitalise on transition finance trends

Market leading Energy Transition franchise & advisory proposition

- Robust demand for clean energy in our footprint
- Helping clients turn transition challenges into executable transactions and solutions
- Core expertise in technologies and applications across hard to abate sectors

Focused Transition Pure-Play Corporate clients growth engine

- Targeting Pure Play clients, i.e., corporates with revenues predominantly from transition or sustainable activities
- Represents a rapidly expanding segment central to future low-carbon economy in our footprint

Untapped Financial Institutions opportunities

- In line with accelerating our FI and O2D growth
- Opportunities spanning across all FI segments:
 - Sponsors investing in scalable low-carbon platforms
 - Tier 2-3 banks developing Sustainable and Transition Finance frameworks
 - Green asset distribution to investors

Enhanced digital capabilities for evolving client needs

We are building technology and capabilities that are simple, fast & connected

	Transaction Services	Global Markets	Global Banking
Current capabilities	- Mint and Burn - Active participant in mBridge - Digital Asset Custody - Collateral Mirroring	Digital Asset Trading	Digital Native Note Issuances on D-FMI infra: Euroclear
Near-term capabilities	- Cross Border Tokenised Deposits - Stablecoin Payouts - EUR and USD Clearing on chain - Digital Asset Custody expansion (SG, HK, MY, Luxembourg) - Zodia Custody integration	- Digital Asset Trading Expansion (HK, SG, Germany, DIFC) - Digital Asset Prime (Trade & Credit Intermediation) - Digital Asset Financing (Repo)	- Digital Native Note Issuances on D-FMI infra: Orion & Clearstream - Islamic Digital Native Notes capability
2026	Digital Assets organisation change – creating integrated solutions		

Example: modernising platforms and channels in Transaction Services

SCPay

Future-ready cloud-native payment platform

- Supporting all payments including digital currencies
 - Connects to blockchain and fits in APIs
- Capable of handling high transaction volume; ~2.5k transactions per second
- Enhanced client experience through standardised reporting, analytics, and data quality

Straight2Bank(\$2B)

Powering a future-ready, omnichannel digital banking platform at scale

- Enabling next-generation client experience with unified design, smart automation, and AI-powered assistance
- Digital gateway across web, mobile, host-to-host and API
 - Straight2Bank Web: 725k users
 - Straight2Bank Mobile: >99% of clients having S2B mobile access to manage their banking on-the-go
 - Monetising reach with Cash and FX Scale API
 - 35 markets, >200 APIs enabled
- Digital asset ecosystem maturing driven by DA APIs
 - Custody, payments including stablecoin-powered rails, tokenised deposits/RWA, staking, on-chain FX settlement

Wealth & Retail Banking

From transformation to outperformance

Judy Hsu

CEO, Wealth & Retail Banking

19 May 2026

We are investing to capture the changing needs of our clients...

These trends structurally increase demand for cross border, advice-led wealth services, where we are well positioned

....as we sit at the intersection of structural wealth flows

Hong Kong and Singapore are emerging as the fastest-growing global wealth hubs, with cross-border wealth bookings projected to grow 12% per annum through 2030³

60% of HNW clients in Asia ex Japan are Business owners², driving integrated banking and wealth demand

Estimated >\$80 trillion global inter-generational wealth transfer over the next 20 years⁴ will accelerate demand for advisory, structuring and international diversification

APAC financial wealth projected to grow ~9% per annum through 2029, outpacing global trends¹

More than 1/3rd of Gen Zs begin investing before entering the workforce⁵, expanding the addressable wealth pool

Executing strongly to accelerate growth in Affluent

Investing for growth

Aligning KPIs throughout the organisation to drive success...

 Client acquisition	>130k new Affluent clients ¹ acquired for 13 consecutive quarters	~400k Total International clients
 Deepen relationships	Doubling ² of net new money to \$52bn	+28% AUM per client ^{2,3}
 RM capacity & productivity	+18% ² Relationship Managers (RMs)	+23% ² Wealth income from seasoned RMs ⁴
 Digital transformation	~2/3 rd reduction in time to onboard clients	>80% wealth sales transacted digitally
 Best-in-class client experience	Achieved Best-in-class NPS in 8 of our top 9 affluent markets for 3 consecutive years	1 in 5 NTB clients coming through referrals from client ⁵

...leading to strong growth and improved returns

WRB income

WRB deposits

Wealth Solutions income

Affluent AUM

2023	2025
WRB RoTE growth

Total Affluent

Priority Private is an attractive segment with compelling economics

- We have launched Priority Private (PP) in top 7 markets with 20 PP wealth centres
- Around three-quarter of PP clients upgraded from within, creating a highly scalable model
- It is the highest-returning segment with materially higher AUM and wealth penetration

Income

Net new money

of clients

Priority Private AUM per client

Fast-scaling Private Bank, climbing from #8 to #5 in Asia

- We are now the 5th largest Private Bank in Asia
- We have invested in talent. RM base has increased by 30% and UHNW client base by 80% over the last 2 years
- Private Bank has superior client economics, is profitable and generates strong returns
- Cross referrals from Private to CIB, and CIB to Private are growing at double-digit rates
- Private Banking clients with CIB relationships generate 4x larger AUM

Income

Net new money

Relationship Managers

Client referrals to CIB

Note: Rank based on APB Asia survey, #8 rank in 2023 and #5 rank in 2025

Built a high-performing and sustainable RM advantage

We are hiring experienced, high quality RMs...

...and enabling them to stay, perform and grow with us

Growth in total RMs¹

+18%

Growth in senior RMs^{1,2}

+40%

Improved RM breakeven³

- Well managed attrition
- 1/3rd of our RMs are from internal referrals
- RM value proposition

- International and internal RM mobility
- RM development programmes
- Support through specialists, service managers and digital infrastructure
- Superior open architecture wealth solutions
- Network and client ecosystem

SME is an attractive source of HNW clients

WRB serves both sides of the client needs – Business and Individual

SME-Affluent client AUM

SME-Affluent client referrals

1. Based on 6 key markets – Hong Kong, Singapore, China, India, Malaysia, Vietnam

Our Digital Banks – Mox & Trust as part of the client continuum

Create a wealth incubator and future Affluent client pipeline

Client case study: Financial Institutions

We supported a Financial Institution client in a challenging environment, leveraging our strength as a connector

Client profile and strategic challenge

- » Chinese bank with 30+ year relationship
- » Long lasting margin compression onshore
- » Overseas expansion needs constrained by limited international experience and geopolitical complexity
- » Abundant RMB liquidity seeking efficient cross-border deployment

How SC delivered value

- » One-stop multi-currency clearing across markets
- » Global network sourcing offshore assets and yield enhancement instruments
- » Integrated custody platform across multiple markets
- » RMB solutioning connecting liquidity with financing needs
- » Trusted core partner across clearing, investment, custody and funding

Outcome

- » 200% Income and Balances
- » 40% transactions
- » 10+ structured deals delivered in 2025
- »  landmark transaction
- »  joint global coordinator for bond issuances
- »  selected as a sub-custodian bank

Client case study: Global Corporates

We elevated our relationship with a Global Corporate client through our network and product capabilities

Client profile and strategic challenge

- » American consumer goods company
- » Relationship with the client and their ecosystem in 33 markets
- » Execution of a complex, multi-region growth strategy
- » Scaling while managing execution risk, balance sheet needs and market complexity

How SC delivered value

- » Differentiated expertise amid the scale-back of international banks
- » Funding support across ecosystem in seven Africa markets
- » Partnership to develop digital assets capabilities
- » Economic Research insights across Rates, FX and Commodities
- » Ecosystem ownership transition support

Speaker bios

Bill Winters
Group Chief Executive

Bill Winters is Group Chief Executive at Standard Chartered, appointed in June 2015.

Bill has had a distinguished career in banking. In 2013, he was awarded a CBE for his services to the UK economy and financial services. Bill was the only career banker to be invited to be a committee member of the UK Independent Commission on Banking, where he recommended ways to improve competition and financial stability in banking. Subsequently, he served as advisor to the UK Parliamentary Commission on Banking Standards and was asked by the Court of the Bank of England to complete an independent review of the Bank of England’s liquidity operations.

Bill is deeply engaged in driving the climate finance agenda. He is a member of the GFANZ Principals Group and a founding member of the World Bank Private Sector Investment Lab.

Manus Costello
Interim Group Chief Financial Officer

Manus Costello was appointed Group Chief Financial Officer, Executive Director of the Board, and a member of the Group Management Team in May 2026, subject to regulatory approval.

Manus is based in London and leads the Group’s Finance, Treasury, Investor Relations and Corporate Development functions.

Manus joined Standard Chartered in 2024 as Global Head of Investor Relations, where he was responsible for managing the Group’s relationships with institutional investors and analysts, communicating financial performance and strategy to the market, and supporting the Bank’s engagement with shareholders.

He has 25 years of experience in financial services, including as a founding partner and Global Head of Research at Autonomous. Before that, he spent 10 years in equity research at Merrill Lynch, based in London and New York.

Tanuj Kapilashrami
Group Chief Operating Officer

Tanuj Kapilashrami is Group Chief Operating Officer, appointed in May 2026. She was appointed as a member of the Group Management Team in January 2019 and is based in the UK.

Tanuj has over two decades of experience in the global financial services sector.

Prior to Standard Chartered, she built her career at HSBC, in a range of country, regional and global leadership roles across multiple markets, including Hong Kong, Singapore, India, Dubai and London. She is often featured in leading global media including the Economist, Financial Times, Bloomberg and the BBC, as well as in publications such as the Harvard Business Review, on a range of topics including culture, leadership, inclusion, and skills.

Her first book The Skills-Powered Organization – The Journey to the Next Generation Enterprise was published by the MIT Press in 2024.

Speaker bios

Noelle Eder
Group Head, Technology & Operations

Noelle Eder is Group Head, Technology & Operations. Noelle's extensive career spans more than 30 years, across financial services, financial technology, healthcare, and hospitality.

She has deep experience in areas from modernising global technology to driving core innovation, as well as in data and analytics, cyber security, product management and software development.

Prior to joining the Bank, Noelle was the Executive Vice President and Global Chief Information Officer at The Cigna Group. Before that, her previous roles include Chief Information and Digital Officer at Hilton Worldwide Holdings, and Chief Card Customer Experience Officer for Capital One Financial Corporation.

She also held leadership roles at Intuit and Teknowledge. She was named one of the top 50 leaders in technology on the Forbes CIO Next List in 2023 and was listed in WomenTech network's 100 Executive Women in Tech to Watch for 2025.

Roberto Hoornweg
CEO, Corporate & Investment Banking

Roberto Hoornweg sits on the Group Management Team as CEO, Corporate & Investment Banking. He also has Management Team responsibility for the Group's activities in Europe, the Americas, the Middle East and Africa.

He joined Standard Chartered in 2017 as Global Head of Financial Markets, leading the teams who help some of the world's largest corporates and financial institutions with risk management, transaction services, financing and research in fixed income, currencies, commodities across more than 50 markets.

Prior to joining the Bank, Roberto led the Liquid Portfolio Strategies funds business at Brevan Howard Asset Management. He previously held senior roles at UBS Investment Bank, including leading global Securities Distribution and co-heading Fixed Income, Currencies and Commodities, and spent 17 years at Morgan Stanley in senior leadership roles across global markets.

Roberto's banking experience was honed during his 17-year career at Morgan Stanley, where he held various senior roles in fixed income derivatives, led the global Emerging Markets Fixed Income & FX business, and was latterly Head of Global Interest Rates, Credit and Currencies.

Speaker bios

Judy Hsu
CEO, Wealth & Retail Banking

Judy Hsu is CEO, Wealth & Retail Banking. She is a member of the Group Management Team and is based in Hong Kong. In addition, she has responsibility for our ASEAN, South Asia, Greater China & North Asia markets.

Previously, Judy was Regional CEO, ASEAN & South Asia, a position she held from 2018, and she was CEO, Singapore from 2015 to 2018. Judy joined the Bank in 2009 as Global Head of Wealth Management and led the strategic advancement of the division. Judy's banking career spans more than 30 years, including various leadership roles in Asia with global, regional and market responsibilities.

She has deep experience in retail banking, wealth management and in developing affluent client strategies, and is passionate about building diverse teams to drive resilience, adaptability and innovation.

Raymond Ang
Global Head, Private Bank and
Affluent Clients, and Head, Wealth
& Retail Banking, Greater China
and North Asia

Raymond joined Standard Chartered in July 2021. His banking career spans over 30 years, having held various senior leadership positions in Asia with extensive regional and country responsibilities.

He has deep experience in Private and Affluent Banking, servicing clients across the wealth continuum.

Raymond joined from UBS AG where he was their Singapore Private Banking Location Head. During the nine years at UBS, he held a number of senior roles, including Head of North Asia, Japan and Indonesia, Head of Ultra High Net Worth Southeast Asia, and Head of Sales for Asia Pacific.

Before joining UBS, Raymond was with The Carlyle Group focused on leveraged buyout in North Asia. He also spent eight years in DBS Bank at the group level and was instrumental in building out their wealth, priority banking and unsecured lending businesses across Asia in the early 2000s. He began his career at Citibank NA in 1994 as a management associate in the consumer banking franchise.

Select technical and abbreviated terms

Term	Definition
Access trade	An example of an access trade is an international financial institution entering into a total return swap structure booked offshore that relates to an underlying comprising a locally issued government bond

YTD	Year-to-date
ZAR	South African rand
%pts	Percentage points

Important notice

Forward-looking statements

The information included in this document may contain ‘forward-looking statements’ based upon current expectations or beliefs as well as statements formulated with assumptions about future events. Forward-looking statements include, without limitation, projections, estimates, commitments, plans, approaches, ambitions and targets (including, without limitation, ESG commitments, ambitions and targets). Forward-looking statements often use words such as ‘may’, ‘could’, ‘will’, ‘expect’, ‘intend’, ‘estimate’, ‘anticipate’, ‘believe’, ‘plan’, ‘seek’, ‘aim’, ‘continue’ or other words of similar meaning to any of the foregoing. Forward-looking statements may also (or additionally) be identified by the fact that they do not relate only to historical or current facts.

By their very nature, forward-looking statements are subject to known and unknown risks and uncertainties and other factors that could cause actual results, and the Group’s plans and objectives, to differ materially from those expressed or implied in the forward-looking statements. Readers should not place reliance on, and are cautioned about relying on, any forward-looking statements.

There are several factors which could cause the Group’s actual results and its plans and objectives to differ materially from those expressed or implied in forward-looking statements. The factors include (but are not limited to): changes in global, political, economic, business, competitive and market forces or conditions, or in future exchange and interest rates; changes in environmental, geopolitical, social or physical risks; legal, regulatory and policy developments, including regulatory measures addressing climate change and broader sustainability-related issues; the development of standards and interpretations, including evolving requirements and practices in ESG reporting; the ability of the Group, together with governments and other stakeholders to measure, manage, and mitigate the impacts of climate change and broader sustainability-related issues effectively; risks arising out of health crises and pandemics; risks of cyber-attacks, data, information or security breaches or technology failures involving the Group; changes in tax rates or policy; future business combinations or dispositions; and other factors specific to the Group, including those identified in Standard Chartered PLC’s Annual Report and the financial statements of the Group. To the extent that any forward-looking statements contained in this document are based on past or current trends and/or activities of the Group, they should not be taken as a representation that such trends or activities will continue in the future.

No statement in this document is intended to be, nor should be interpreted as, a profit forecast or to imply that the earnings of the Group for the current year or future years will necessarily match or exceed the historical or published earnings of the Group. Each forward-looking statement speaks only as of the date that it is made. Except as required by any applicable laws or regulations, the Group expressly disclaims any obligation to revise or update any forward-looking statement contained within this document, regardless of whether those statements are affected as a result of new information, future events or otherwise.

Please refer to Standard Chartered PLC’s Annual Report and the financial statements of the Group for a discussion of certain of the risks and factors that could adversely impact the Group’s actual results, and cause its plans and objectives, to differ materially from those expressed or implied in any forward-looking statements.

Non-IFRS performance measures and alternative performance measures

This document may contain: (a) financial measures and ratios not specifically defined under: (i) International Financial Reporting Standards (IFRS) (Accounting Standards) as adopted by the European Union; or (ii) UK-adopted International Accounting Standards (IAS); and/or (b) alternative performance measures as defined in the European Securities and Market Authority guidelines. Such measures may exclude certain items which management believes are not representative of the underlying performance of the business and which distort period-on-period comparison. These measures are not a substitute for IAS or IFRS measures and are based on a number of assumptions that are subject to uncertainties and change. For further information, please refer to Standard Chartered PLC’s Annual Report and the financial statements of the Group and, specifically in relation to adjusted net interest income and adjusted non-interest income, please refer to the footnote beneath the “Net interest income and non-interest income” section on page 6 of Standard Chartered PLC’s Q1’2026 results announcement.

Financial instruments

Nothing in this document shall constitute, in any jurisdiction, an offer or solicitation to sell or purchase any securities or other financial instruments, nor shall it constitute a recommendation or advice in respect of any securities or other financial instruments or any other matter.

Caution regarding climate and environment-related information

Some of the climate and environment-related information in this document is subject to certain limitations, and therefore the reader should treat the information provided, as well as conclusions, projections and assumptions drawn from such information, with caution. The information may be limited due to a number of factors, which include (but are not limited to): a lack of reliable data; a lack of standardisation of data; and future uncertainty. The information includes externally sourced data that may not have been verified. Furthermore, some of the data, models and methodologies used to create the information is subject to adjustment which is beyond our control, and the information is subject to change without notice.
