

Bugasura

**The Ultimate AI-powered bug tracker
for modern tech teams**

Bugasura is the simplest issue and bug tracker for modern technology teams. It brings together teams and customers with absolute ease.

About us

Bugasura is a product of Moolya Software Testing Technologies - a leader in the global software testing space since the last 12 years.

It was born as a way to **reinvent the way managing bugs in software works today**. Popular tools like JIRA were built in the 1990s that have now become ineffective in a modern world.

Bugasura is changing the way teams collaborate and helps teams reduce the time to deliver quality technology to their customers.

Bugasura is growing globally

We have seen significant growth in the number of teams buying Bugasura from all around the world.

25+ countries

30000+ users

Rated 4.8/5

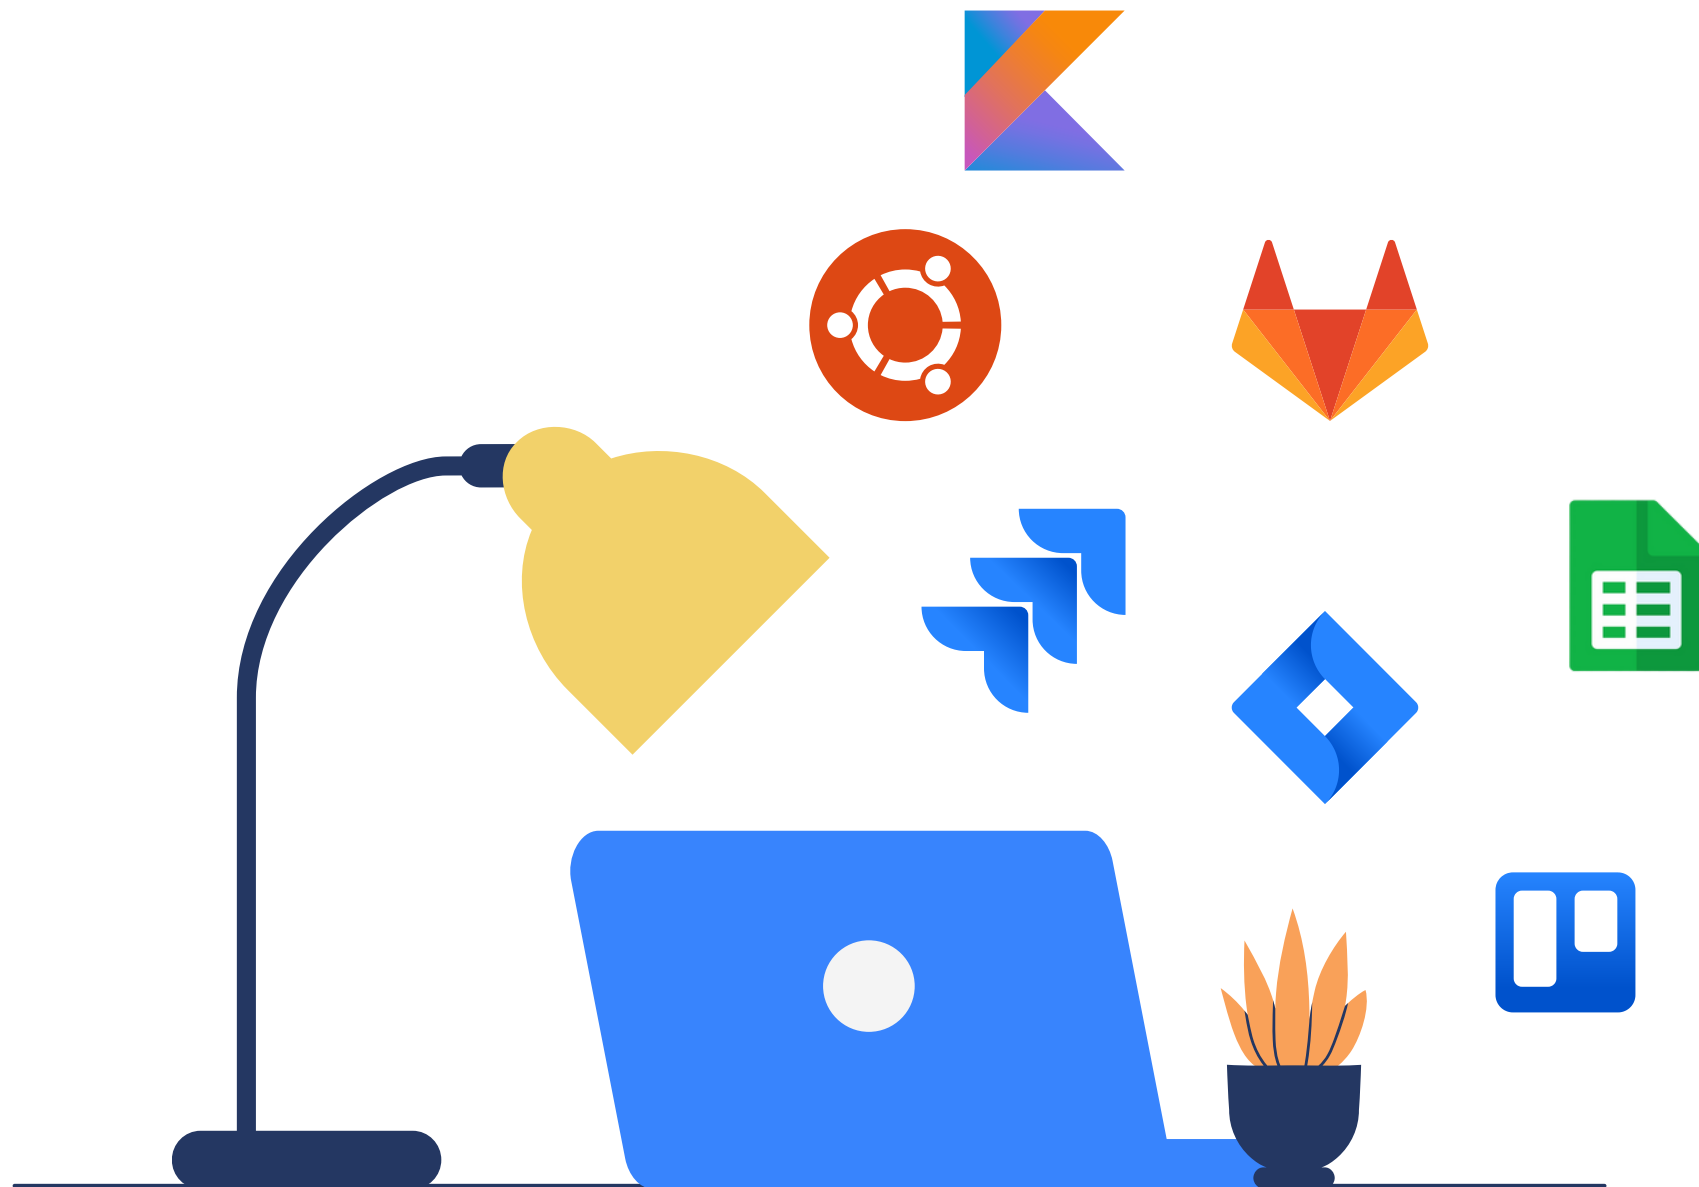

Best customer support

100% uptime

The problems with other legacy tools in the market

They slow you down

Complex tools and fragmented workflows are the top reasons that take away from dev team productivity and shipping faster.

They prevent collaboration

Today, great technology is built on constant collaborative feedback. Tools like Jira aren't built for use cases to bring customers, vendors and internal teams together.

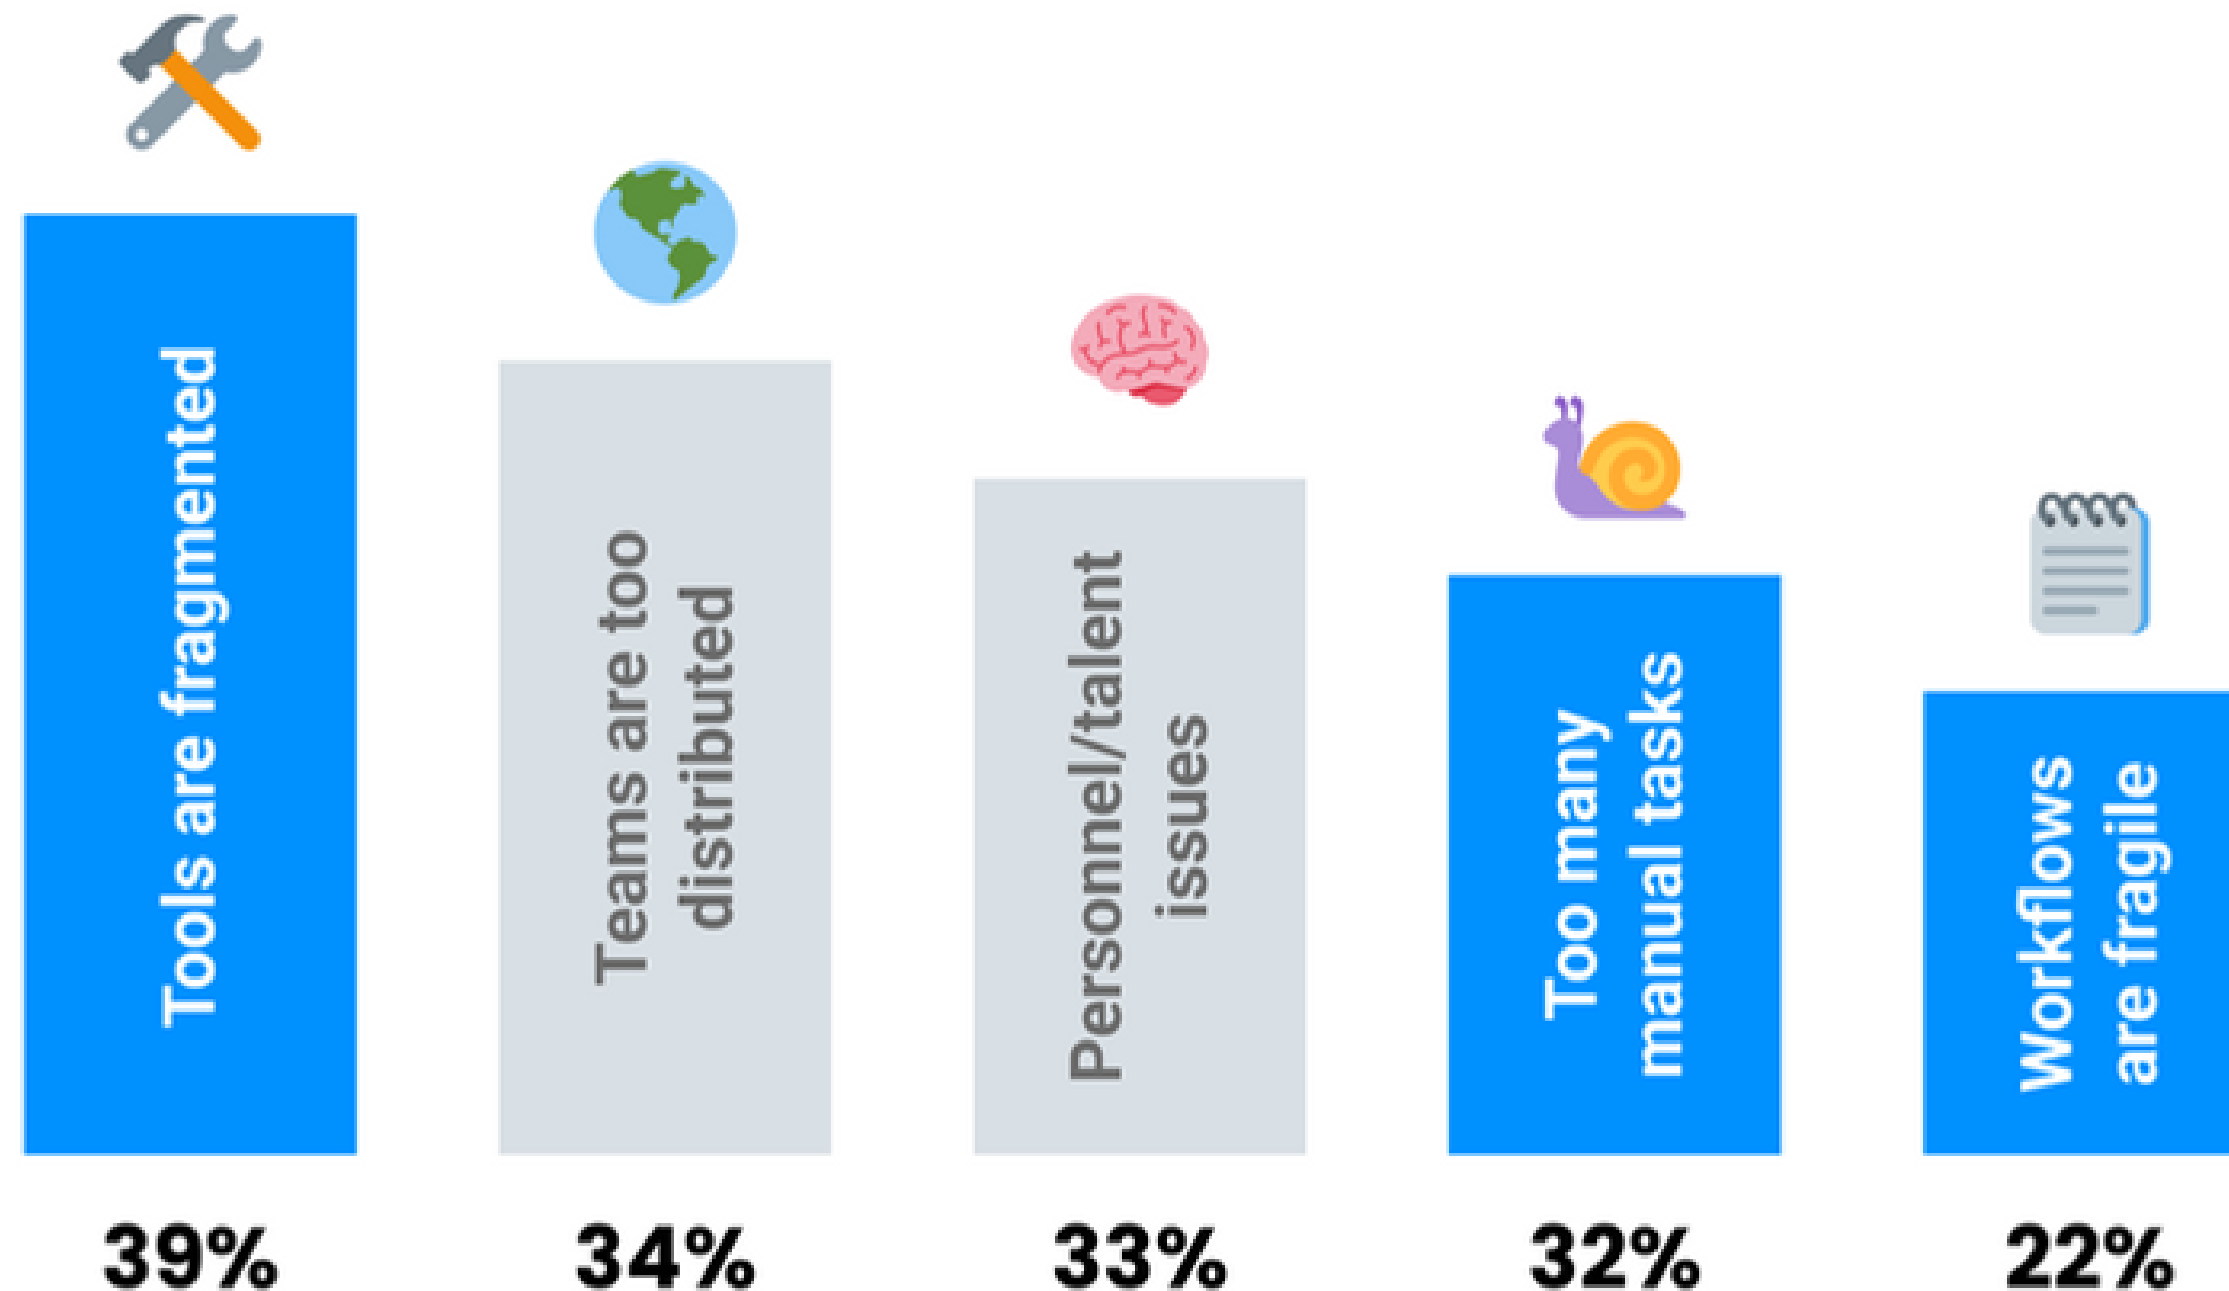

They cost you more than you know

Teams that move slow don't just add lesser customers but also tend to stop you from attracting great dev talent.

Introducing Bugasura

Deliver best quality software to customers, lightning fast with **Bugasura.io**

Organise projects beautifully

The screenshot shows the Bugasura Projects dashboard. On the left is a blue sidebar with icons for Projects, Home, and Profile. The main content area has a header with the text "No projects is completed untill its objective has been acheived." and a subtext "You can name your project after your app to start with." Below this is a filter bar with tabs: "All (234)", "Private (23)", "Public (203)", and "Contributed Projects (8)". The "All (234)" tab is selected. Below the filter bar is a search bar and three dropdown menus: "All Teams", "All Platform", and "All". A "+ Create Project" button is on the right. The main area displays a grid of project cards. Each card shows the project name, team, and a progress bar with "Open" and "Closed" issues.

Projects

No projects is completed untill its objective has been acheived.

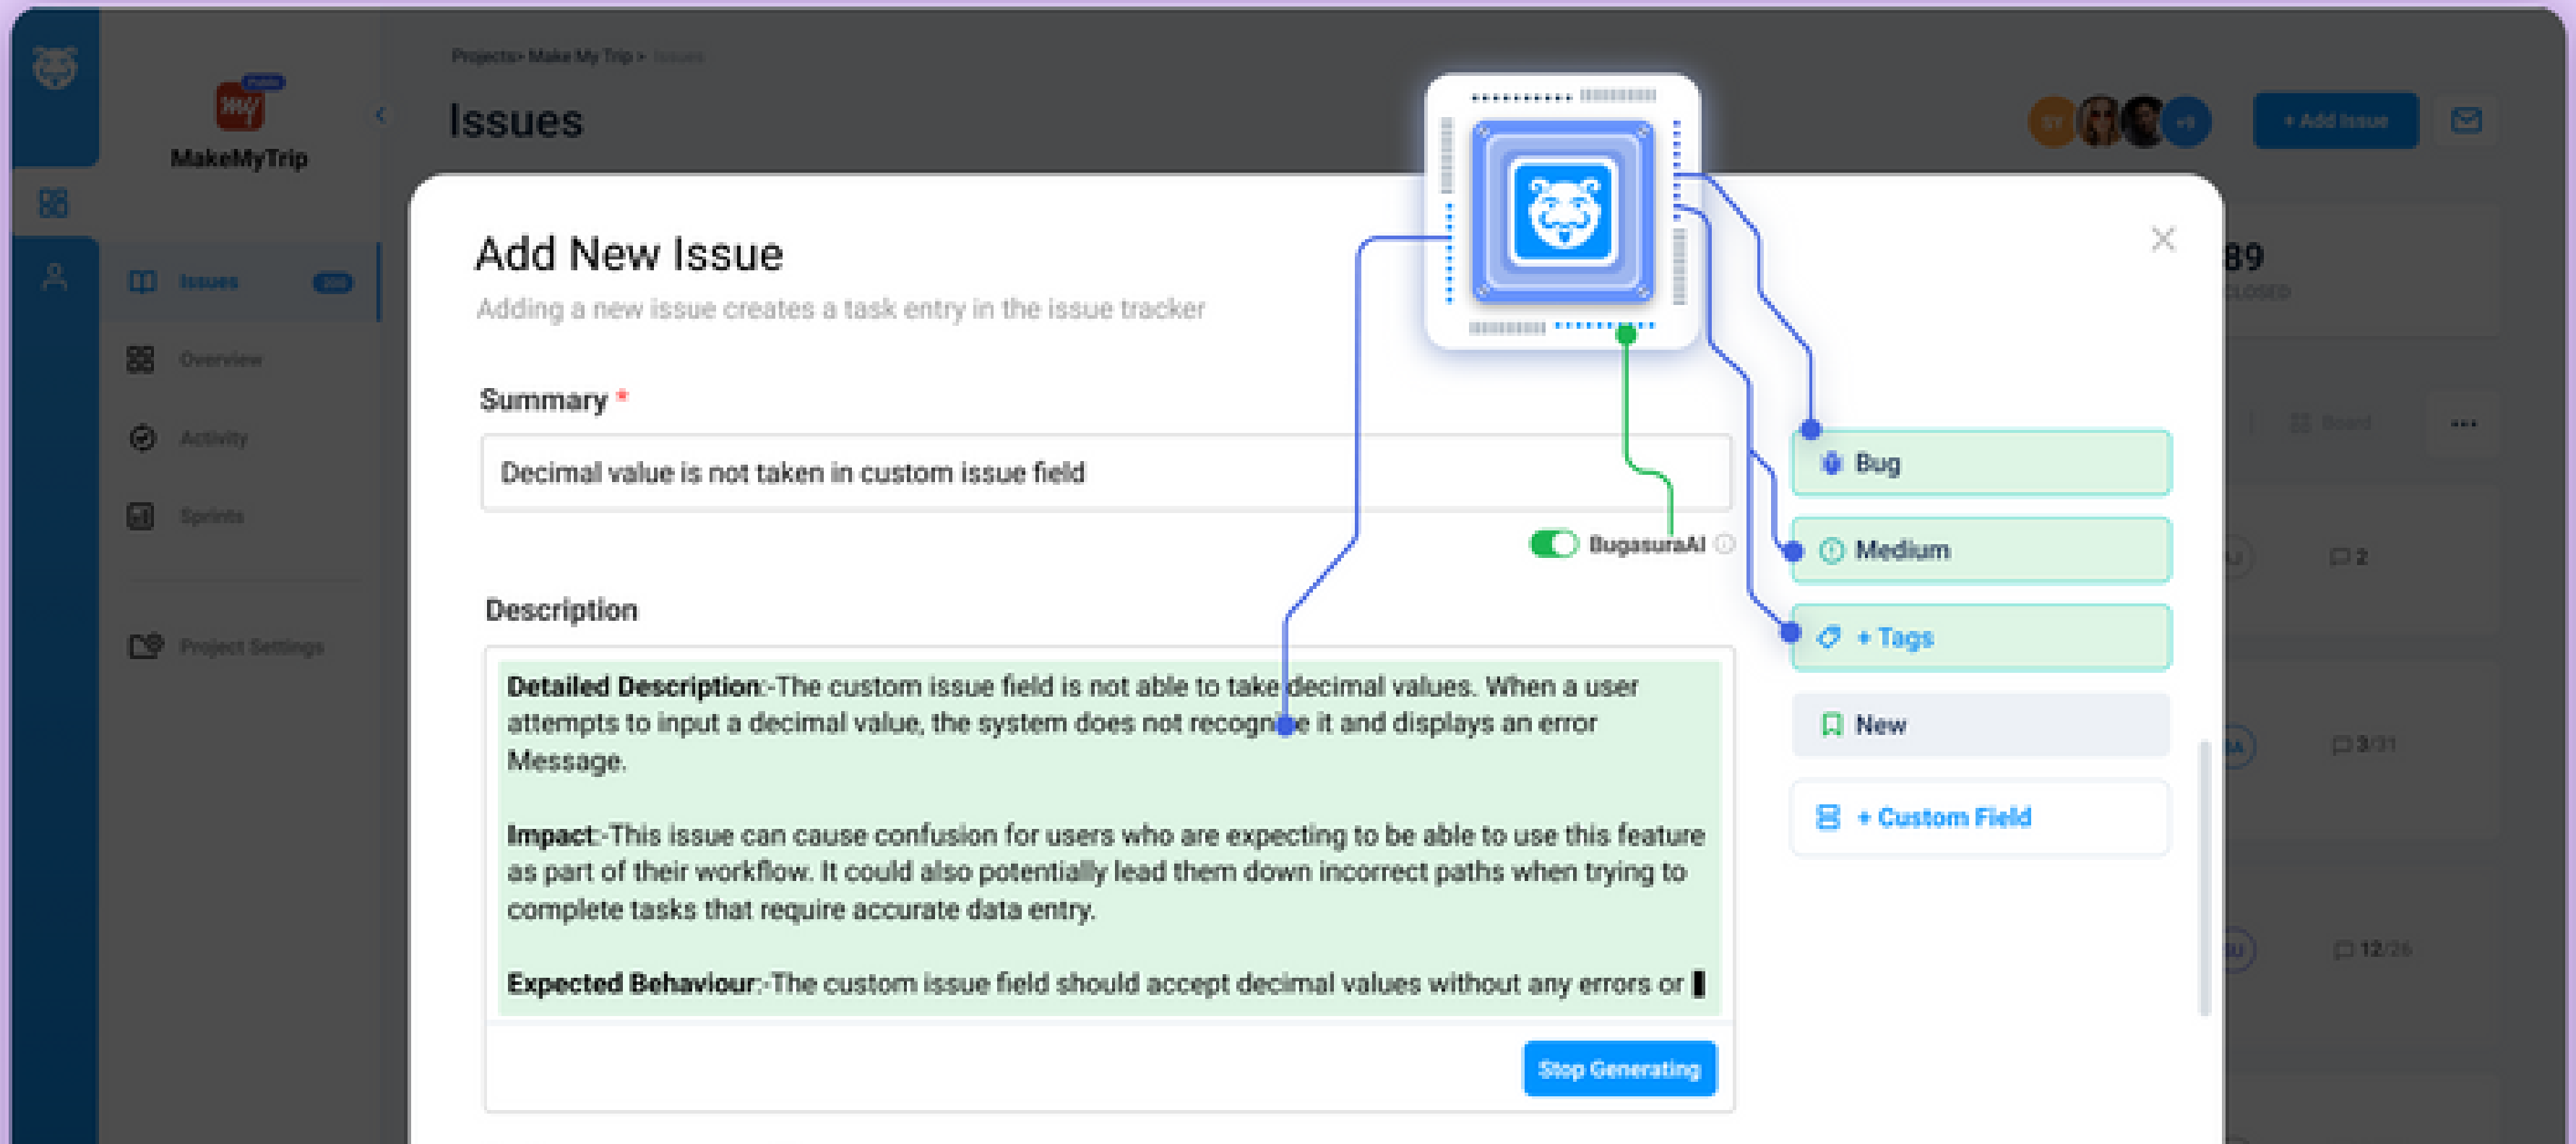

You can name your project after your app to start with.

Automatically update description, bug type, severity and tags

The screenshot displays the 'Add New Issue' form in the Bugasura AI interface. The form is titled 'Add New Issue' and includes a sub-header 'Adding a new issue creates a task entry in the issue tracker'. The 'Summary' field contains the text 'Decimal value is not taken in custom issue field'. The 'Description' field is populated with a detailed description, impact, and expected behavior. A 'BugasuraAI' toggle switch is visible next to the description field. The sidebar on the right shows options for 'Bug', 'Medium', '+ Tags', 'New', and '+ Custom Field'. A 'Stop Generating' button is located at the bottom right of the description field.

Add New Issue
Adding a new issue creates a task entry in the issue tracker

Summary *
Decimal value is not taken in custom issue field

Description

Detailed Description: The custom issue field is not able to take decimal values. When a user attempts to input a decimal value, the system does not recognize it and displays an error Message.

Impact: This issue can cause confusion for users who are expecting to be able to use this feature as part of their workflow. It could also potentially lead them down incorrect paths when trying to complete tasks that require accurate data entry.

Expected Behaviour: The custom issue field should accept decimal values without any errors or

Detect similar issues logged in the project to reduce double work

The screenshot displays the Bugasura AI interface within a project management tool. A modal window titled "Add New Issue" is open, showing a summary of a new issue: "Decimal value is not taken in custom issue field". A Bugasura AI icon is positioned above the summary field, with lines connecting it to the summary and the "Similar issues found" section. The "Similar issues found" section lists three related issues: BUG01, BUG05, and BUG10, all describing decimal value handling problems. The "Description" section provides a detailed description and impact of the issue. On the right side of the modal, there are buttons for "Bug", "Medium", "+ Tags", "New", and "+ Custom Field". The background shows the project's issue tracker interface with a sidebar and a list of issues.

Get a visual overview of project issues

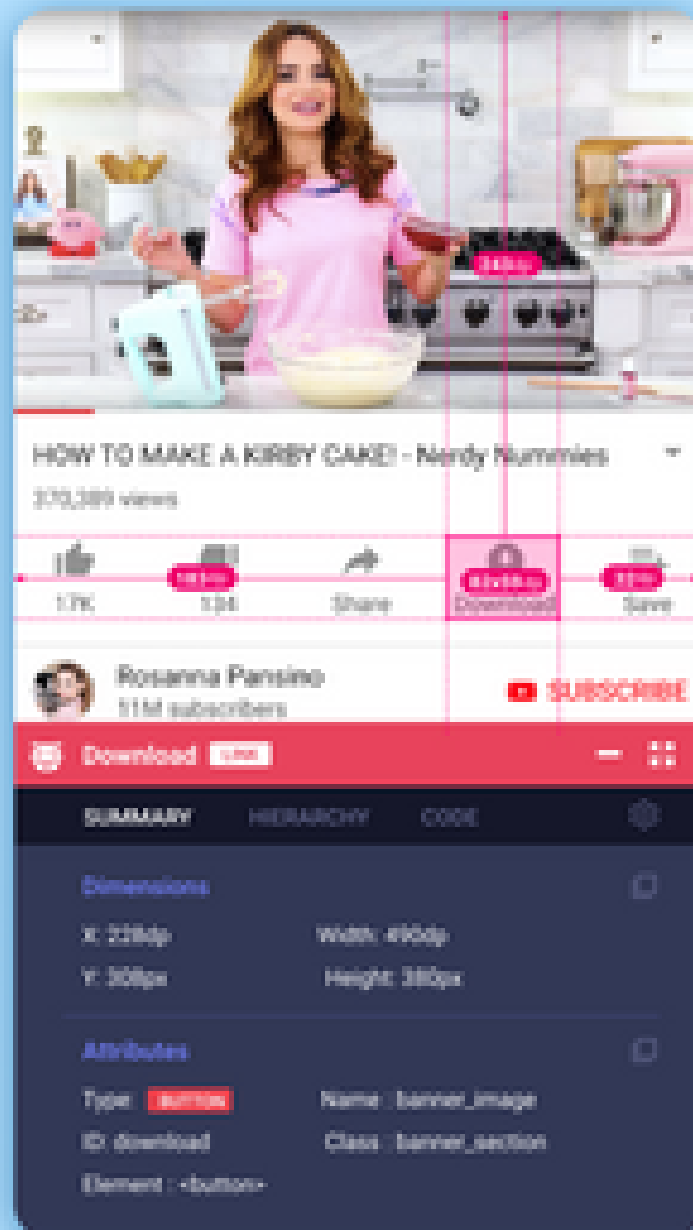

Collaborate with teams, vendors, suppliers, and customers easily without compromising privacy or visibility

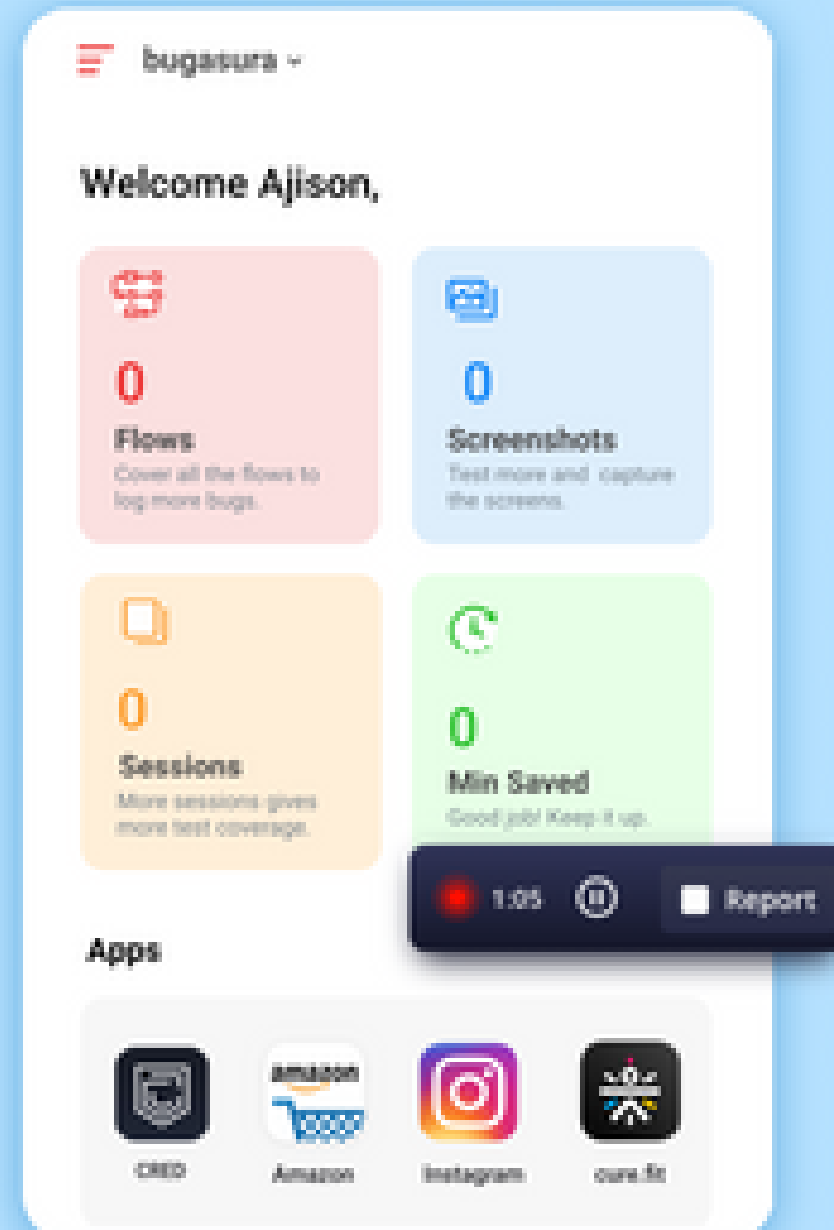

The screenshot displays the Bugasura issue management interface. On the left is a blue sidebar with navigation icons and labels: 'My Task' (with a document icon), 'Overview' (with a list icon), 'Issues' (with a book icon and a blue badge), 'Activity' (with a clock icon), 'Sprints' (with a calendar icon), 'Performance' (with a bar chart icon), and 'Project Settings' (with a gear icon). The main content area is divided into several sections. At the top, there are tabs for 'Issue ID' and 'Issue Status', and fields for 'Created By' and 'Created On'. Below this is a 'Summary' section with an 'Issue Type' dropdown and a text field for 'Feature Name / Page Name / Test Case ID', along with a 'Jira Issue' button. The 'ISSUE DETAILS' section includes a 'Description' field with placeholder text: 'Your description here example: Just like published color styles, published text styles are shared across your team. Change text styles by selecting a text layer with the style and clicking on in the panel to the right..'. Below the description are 'Assignees' (four avatars) and 'Tags' (Functional, UI, UX). The 'ATTACHMENT' section has a dashed box with the text 'Drag & Drop files to attach or Browse'. The 'WORKFLOW' section contains 'Status' and 'Severity' dropdowns. The 'DEVICE DETAILS' section is partially visible at the bottom right. A 'Reject Reason' modal is open at the bottom left, showing a text input field with the placeholder 'Enter Reason' and a '+' button.

Bugasura integrates with your flow of work!

We are where you are.

We have integrations with your entire Dev stack and have more in the roadmap.

Bugasura is great for you if

- You are a growing team with cross border/remote working systems
- You work with development, design, QA, CS, marketing teams actively
- You want to bring customers, vendors, and internal teams on one tool without compromising visibility for each stakeholder
- You need an efficient, dedicated, deep bug tracker for your technology
- If you're tired of using too many tools to communicate with teams

The Bugasura impact

elevate

A real time brand performance reporting platform,
which measures performance pre and post offline events.

Moved from **JIRA** because of
collaboration & scalability blockers

JIRA was becoming expensive & slow
for the expanding global team

Moving to Bugasura helped Elevate Global **expand their product into different geographies 2X faster** and helped **all global markets function easily with multiple teams** on a common MIS reporting system.

The Bugasura impact

Gullak

A fintech mobile application that allows users to optimise savings and invest in gold.

Moved from **Excel Sheets** because tracking and fixing bugs was becoming complicated.

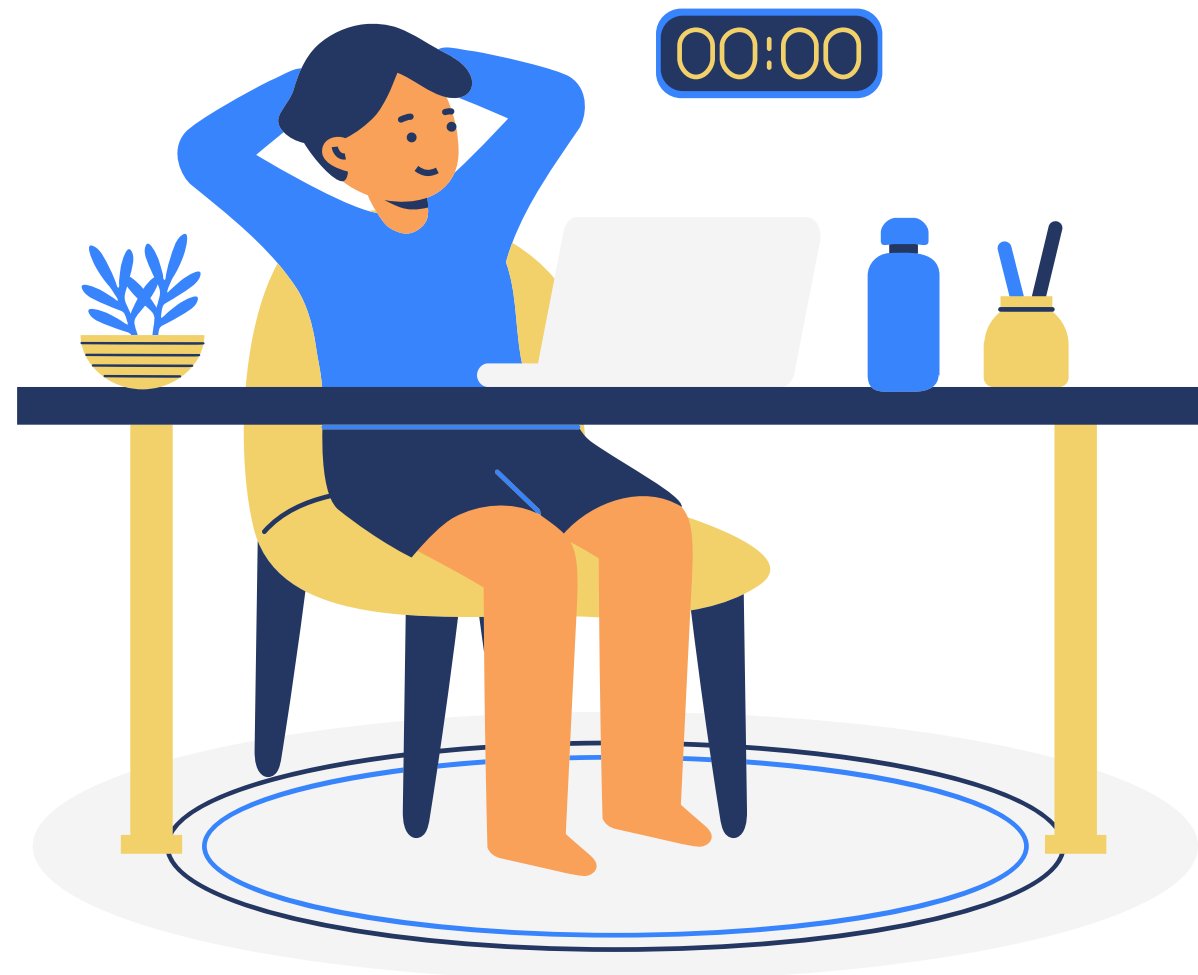

Critical bugs were starting to leak into production and costing the team revenue.

Moving to Bugasura helped team Gullak streamline their entire testing and quality process. **It sped up the team's GTM launch and helped them catch critical bugs with the reporter before it could get into production.**

Modern tech teams ♥ Bugasura

This is a beautiful
tool and our teams
love it.

Good Software,
maybe exactly
what you need.

Great Tool, exactly
what I needed.

Powerful and yet
simple issue tracker,
our teams love.

Bugasura voted #1 Product

Featured as **top product on Product Hunt** - a community of startup enthusiasts, product managers, developers, marketers and investors

Why customers love Bugasura

Aashray Singhal @aashray_singhal 

This is a brilliant tool. I remember how frequently we used to face issue in terms of tracking jira request week on week basis.

A brilliant add-on and nice LP as well.

Pauline Rossi @pauline_rossi 

Love how inclusive this tool is! I usually never feel welcome in technical projects but this is so simple! I can't wait to try it 🙌

Nattu CodeWalnut @nattu_codewalnut 

We had Jira for issue tracking and the client had to stop the licenses as it costed a bomb for a team of 20. When we tried Bugasura, it was surprisingly easy and business teams who usually resist new UI were quite happy to adopt this tool. Great UX is a big plus as collaboration is critical in the testing space.

Great work and look forward to more action from Bugasura

What customers love about Bugasura

Arslan Ali

Best issue tracking and reporting tool with a thought for test team pain points and how to solve them!

Really good for rapid testing and teams with high volume of device and OS dependencies!
